Titian Software Ltd

- Founded 1999
- Specialising in software for sample management
-  **mosaic** is our product suite for sample management
- Team of 40+ software engineers working full time on Mosaic development

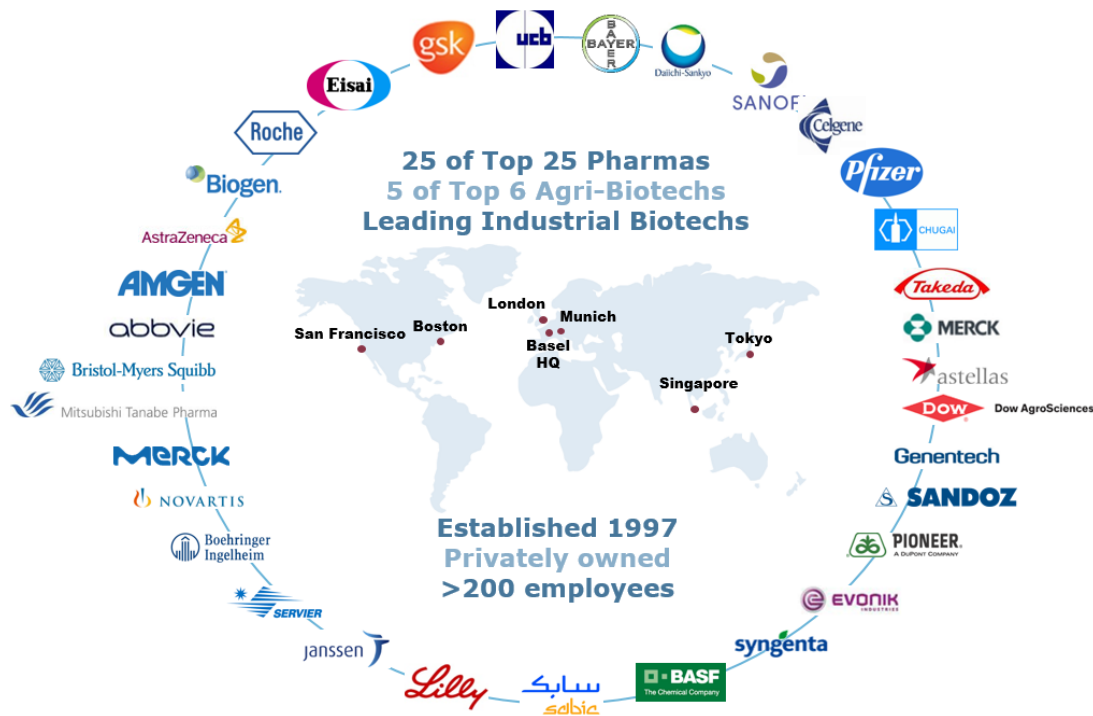

Mosaic Sample Management

- Proven sample inventory tracking and an error-free supply chain to maximise sample management productivity.
 Inventory Tracking  Automation Integration
- The comprehensive inventory management gives real-time information on sample location, container information and substance data.
 Ordering  Tracked Shipping
- Mosaic integrates easily with automated storage and sample handling systems to facilitate error free quick turn-arounds.
 Sample Processing  Connectivity

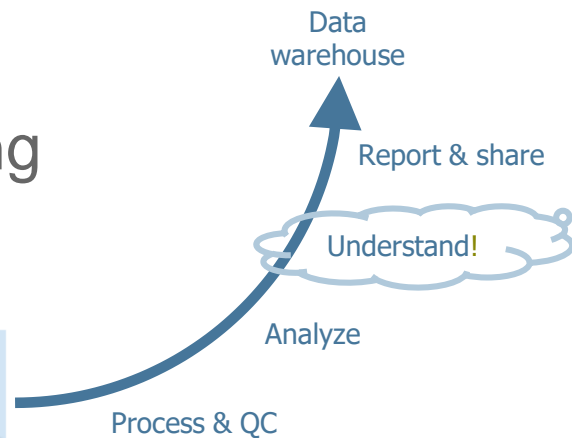

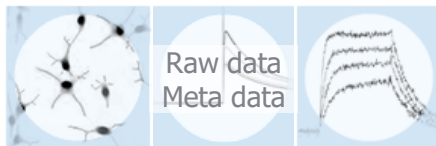

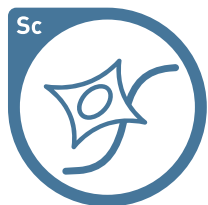

Genedata

...transforms
scientific data into
intelligence with a
portfolio of advanced
software solutions
and consulting

Genedata Screener[®]

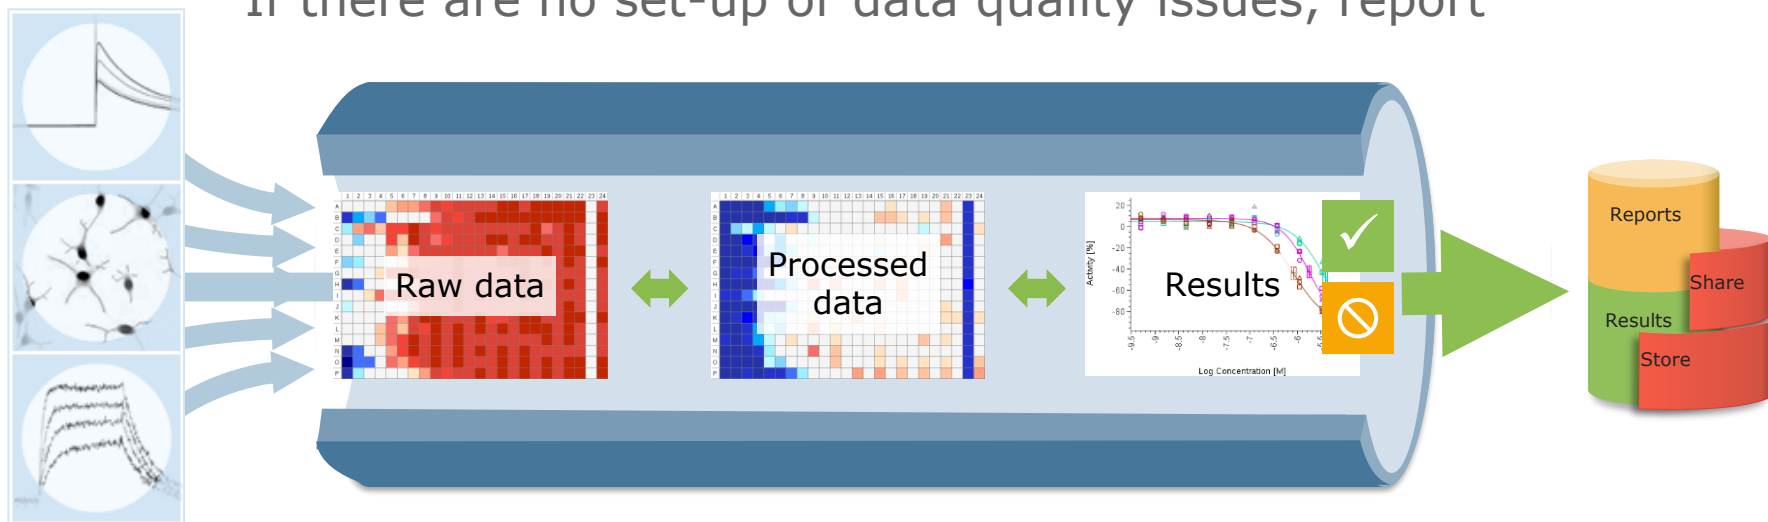

- Streamlined workflows
- Superior data quality
- Improved understanding

As Automated And Flexible As Needed

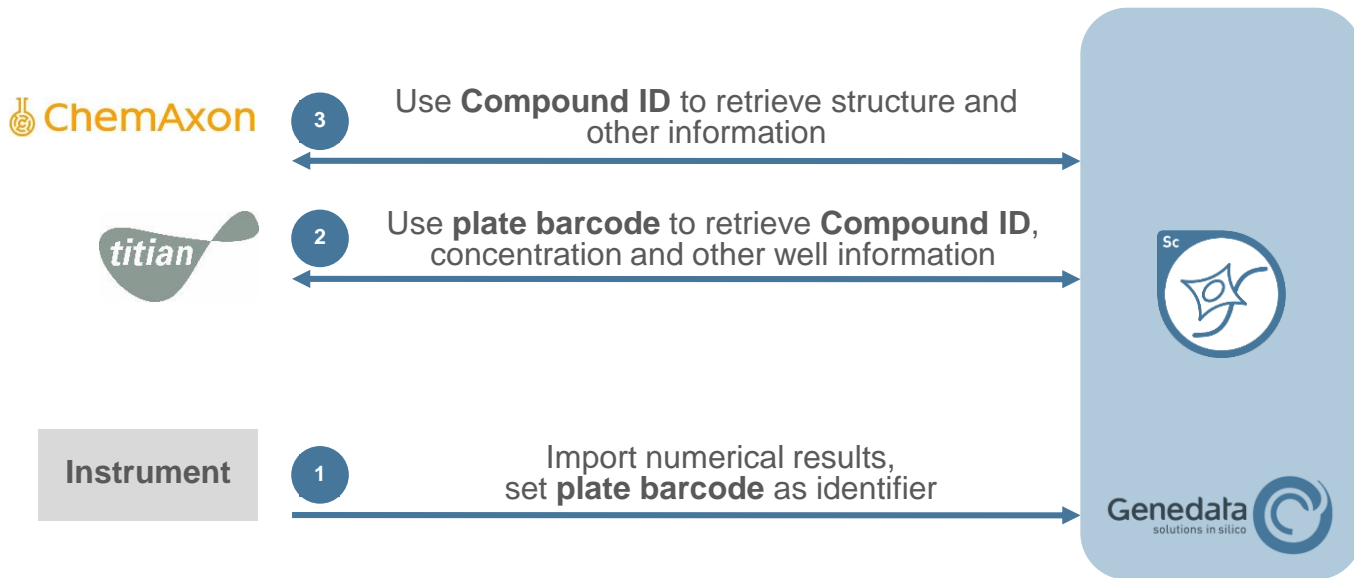

Import your data and view the results directly

If there are no set-up or data quality issues, report

If there are issues, go directly to the source and interactively address them

How It Works

Benefits

Long-term partnership

Out-of-the-box solution

Efficient workflows
